Sharing of Research Submission Form

Please complete the boxes most applicable to you with brief information about the research you wish to share (one form per piece of research).

KEYWORDS: Foundation Degree, work based learning, information advice & guidance
e.g. students, employers, skills (more than one may be appropriate)

TITLE: Development of Foundation Degrees (FDs) for the information, advice & guidance (IAG) sector in South West England

PURPOSE: To research and develop new Foundation Degrees across the South West of England in the IAG sector.

EXPECTED COMPLETION DATE: July 2009

METHOD (please include information about the number and type of participants):
Working with FE and HE institutions (HEIs) across the South West to develop new Foundation Degrees, including funding and supporting:

- the bringing together of employer forums
- development of new programme proposals for submission to validating HEIs
- programme development and validation
- the development of e-learning materials to support delivery

It is envisaged that the new FDs will be flexible and work-based in nature, and be delivered part-time and/or via e-learning/distance learning to suit the needs of employers, who are key to the development of appropriate content and delivery modes.

Currently working with 2 FE colleges and 1 HE institution – all materials developed are shared across SWLLN partners and collaboration between partners is fundamental to the project.

Targets: launch of at least one new FD, starting in autumn 2008.

OUTCOMES OF RESEARCH (if complete):

COMPLETED RESEARCH:

How will the findings be disseminated? Via SWLLN dissemination events, which will be widely advertised throughout the region, and via the SWLLN website: www.swlln.ac.uk

Is a final report available? No

If yes, where can it be found? Reports and updates published on www.swlln.ac.uk
